

Workshop

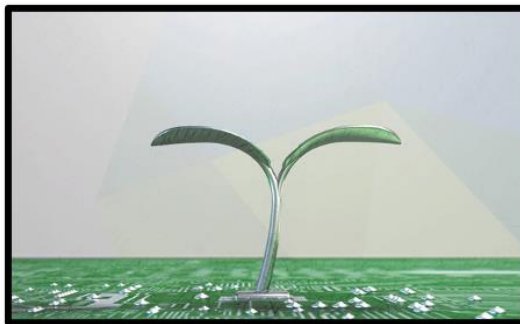

Long-Term Field Experiments:

"Lift the agricultural data treasure!"

SAVE THE DATE

8-9 November 2022

Müncheberg, Germany

Context

Long-term field experiments (LTEs) are agricultural experiments for monitoring soil and crop properties in changing climate conditions and different management practices. Within the framework of the BonaRes (www.bonares.de) program, a data infrastructure has been developed to collect and process the meta-information and research data of LTEs. In this regard, LTEs with a minimum duration of 20 years in Germany and Europe have been continuously identified and processed since 2015. The BonaRes initiative aims to improve the reuse of LTE data and facilitate scientific collaborations through the networking of researchers. With this workshop we want to bring LTE owners and past and future users of LTE data together with the goal to “lift the LTE data treasures together.”

Date and Venue

The workshop will be organized on 8-9 November 2022 at the Leibniz Centre for Agricultural Research (ZALF) in Müncheberg, Germany.

Scope of the event

Presenting the activities and advantages in publishing and using LTE data, including:

- i) Demonstration of the BonaRes Centre’s LTE activities including the LTE overview map
- ii) Practical showcasing for reusing LTE data
- iii) Assisting LTE owners with data publishing
- iv) Initiation of cooperations

It will comprise the exchange of experiences of (a) LTE data providers including the process for publishing LTE data in the BonaRes repository and (b) selected data users (i.e. modellers). The workshop will be held in English and/or German upon demand.

Target groups

- LTE- owners who provided LTE- data to the repository or who consider to do so in the future.
- BonaRes researchers who use or wish to use LTE data for their ModuleA projects,
- LTE data users who can exemplify experiences and expectations of the repository,
- Researchers to share their experiences with the BonaRes Centre and project.

Important Dates

Abstract submission	2 September 2022
Deadline for registration	12 October 2022
Workshop	8-9 November 2022

Contact: lte.service@zalf.de

Workshop

Long-Term Field Experiments: *"Lift the agricultural data treasure!"*

Preliminary Agenda

8. November 2022

13.00 – 15.00 Welcome, BonaRes presentations

15.00 – 15.30 Coffee break

15.30 – 17.30 Highlight presentations

17.30 Ice Breaker - Dinner

9. November 2022

09.00 – 09:30 Keynote presentation

09.30 – 11.30 Group work on experiences, ideas, synergies

11.30 – 12.30 Synthesis

12.30 Lunch (optional)

Note: The final version of the agenda will be advertised in October 2022.

Workshop Registration

Long-Term Field Experiments: *“Lift the agricultural data treasure!”*

Date: 8-9 November 2022

Place: Leibniz-Centre for Agricultural Landscape Research (ZALF), Eberswalder Str. 84, 15374, Müncheberg, Germany.

Deadline for abstract submission: 2 October 2022

Deadline for registration: 12 October 2022

I am submitting the following abstract for the Long-Term Field Experiments: “Lift the agricultural data treasure!” workshop:

Author(s)	
Institution	
E-mail	
Title	
Abstract (300 words max.)	

Please submit the following form and your abstract before the submission deadline to the contacts provided below.

Registration

Per e-mail to: lte.service@zalf.de

Per fax to: +49 (0)33432 82-387
